Claims 4-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer back in the alternative only and/or not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, these claims have not been further treated on the merits.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 18-20 are omnibus type claims that fail to further define the claimed invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Galbraith (U.S. Patent 4,664,252).

Galbraith shows an idler 28 having at least one inwardly projection core formation 40 with outwardly projections 36 that engage with inward projections 34.

Re claim 2, shown is a plurality of projections.

Re claim 3, shown are inward and outward projections.

Re claim 14, there is a plurality of inwardly projecting ribs.

Re claims 15 and 16, plastic material is disclosed.

Art Unit: 3651

Re claim 17, there is bearing receiving zone at the roller ends

Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Agnoff (U.S. Patent 6,209,702).

Agnoff shows a labyrinth seal 22 for a bearing 38 with the seal located between shield 40 and body 20.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited are various rollers with seals and interlocking projections.
